

## Motiva Linear Lite™

The 'Linear Lite' is an aluminium version of our popular Motiva Linear™ design suitable for lower duty applications such as residential settings, some hospitality uses and even some educational environments. The Linear Lite is particularly suited to applications where wall mounting is possible one side but independent versions are available. This monopitch (asymmetric) straight roof variant is where one side is higher than the other. This is the standard configuration for canopies located against building elevations but also used for many applications including walkways and outdoor play areas. Widths of up to 4000mm are standard with this product but up to 7000mm is available if required.

- ✓ Straight roof design
- ✓ Integral gutters and RWPs
- ✓ Aluminium framework
- ✓ Finished in four standard colours (any RAL colour available)
- ✓ Glass or polycarbonate options

### Appearance

Aluminium on the Motiva Linear Lite™ canopy is finished in PPC colour finish. Polycarbonate roof covering is either clear or opal as standard or can

be coloured at extra cost. Glass would typically be clear. Post pads can be any colour, often contrasting with the structure.

### Services

If you are considering the Motiva Linear Lite™ canopy we would recommend an early consultation to consider all aspects of the proposed canopy installation, we provide free quotations and technical information at design stage with drawing files of all details which can be easily incorporated into architects' drawings. Full site surveys, CAD drawings and project management are all part of our standard service. Early technical involvement in projects can generally provide a better solution.

#### BESPOKE PRODUCTS

Bespoke products are possible due to our ability to extensively customise our products ensures that we can meet any special requirements that you may have. Our flexible modular system often allows this to be done very economically whilst retaining the performance characteristics of our system.
